

Matt Loera

Computer science graduate and community-centered systems thinker

Portland, OR · mattsloe@gmail.com · 214-336-1774 · mash-web.com

SUMMARY

Computer science graduate with experience spanning systems programming, data structures, community-based research, and hands-on operations work.

Brings a mix of technical training, strong writing, and lived knowledge of housing and tenant issues, with particular interest in systems, data, and work that has real community impact.

EXPERIENCE

Future Generations Collaborative

May 2021-September 2024

Partner · Portland, OR

- Contributed to writing for the Tribal Maternal, Infant, and Early Childhood Home Visiting (MIECHV) grant supporting the early childhood program.
- Helped with yearly reporting and data collection connected to grant-funded program requirements and accountability.
- Contributed to community-based research and education work focused on Indigenous data sovereignty and housing equity.
- Helped create play spaces and support programming for families through the Future Generations education model.
- Supported planning and outreach connected to Barbie's Village, a housing initiative for women and families escaping domestic violence.
- Conducted community outreach and education related to equitable housing access, tenant protections, and anti-displacement work.
- Built partnerships with local organizations focused on housing security, community engagement, and mutual support.
- Used data and storytelling to communicate community needs in ways that aligned with Indigenous values and context.

Punch Bowl Social

2018-Present

Bar Manager · Portland, OR

- Managed day-to-day restaurant operations across bartending, customer service, staff coordination, and event support.
- Handled accounting, cash management, and other operational responsibilities in a fast-paced service environment.
- Created craft cocktail menus and supported catered events with a focus on execution and guest experience.
- Adapted quickly across roles and shifting business needs while maintaining reliability and attention to detail.

Soho House

November 2025-Present

Bartender · Portland, OR

- Work as a bartender in a high-service hospitality environment with an emphasis on consistency, speed, and guest experience.
- Support daily service operations while maintaining clear communication with coworkers and adapting to changing floor needs.
- Balance customer service, attention to detail, and fast execution during busy shifts.

PROJECTS

Bar Inventory App

2026

AI-assisted inventory workflow

- Built a voice-to-inventory app that converts unstructured spoken inventory notes into cleaner inventory data for bar operations.
- Designed a command-driven parsing workflow to match voice transcription output against inventory sheet items while reducing AI API calls by roughly 80%.
- Combined TypeScript, React, Python, SQL, AI-assisted workflows, data cleaning, and firsthand hospitality operations experience.

SKILLS

Programming: C; C++; JavaScript; TypeScript; React; Python; HTML; SQL

Computer Science: Systems programming; Data structures; Digital circuits; SQL databases; Continuous integration environments

Community & Research: Community organizing; Policy research; Housing advocacy; Land use advocacy; Participatory action research; Grant writing; Federal grant reporting support; Transportation advocacy

Tools: Google Suite; Slack; Trello; Canva; Instagram

Strengths: Strong writing; Research; Public speaking; Event coordination; Coalition-building; Data collection; Adapting quickly to varied team environments

EDUCATION

Portland State University

Winter 2025

B.S. in Computer Science · Portland, OR

- Graduated Winter 2025.
- Related coursework included Systems Programming, Digital Circuits, Data Structures, Cognitive Science, Web Design, and SQL Databases.
